

## DATI TECNICI — CARATTERISTICHE

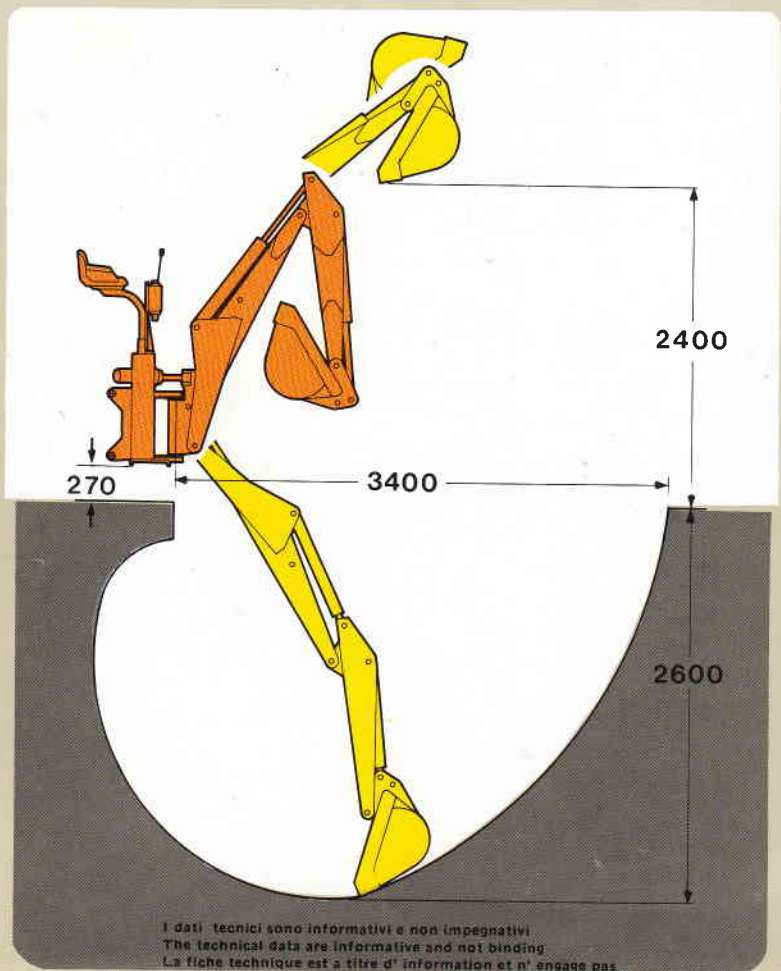

- Pressione di esercizio 160 Kg/cm<sup>2</sup>
- Forza di strappo sulla punta del dente 2500-2850 Kg
- Portata pompa 30 Lt/min
- Peso con benna standard 650 Kg
- Distributore predisposto di valvole su ogni sezione e movimenti simultanei
- Telaio traslabile per spostamento dei bracci in qualsiasi posizione
- Stabilizzatori indipendenti
- Materiale di costruzione ASTM 440
- Perni e boccole in acciaio cementato e rettificato
- Benne da larghezza 250 mm a 600 mm
- A richiesta : Bloccaggio idraulico

## OPERATING DATA — PARTICULARS

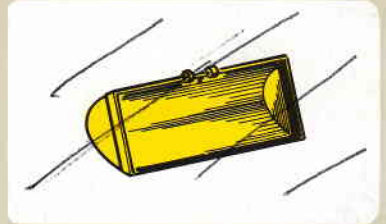

- Operating pressure 160 Kg/cm<sup>2</sup>
- Tearing power to the tooth 2500-2850 Kg
- Capacity of the pump 30 Lt/min
- Weight with standard bucket 650 Kg
- Distributor provided with valves on every section and simultaneous movements
- Transferable frame for arms shifting towards any position
- Independent stabilizers
- Building material ASTM 440
- Pins and bushes of casehardened rectified steel
- Buckets width 250 mm to 600 mm
- On request, hydraulic block

## RENSEIGNEMENTS TECHNIQUES CARACTERISTIQUES

- Pression de service Kg/cm<sup>2</sup> 160
- Force d'arrachée à la pointe du dent Kg 2500-2850
- Portée pompe Lt/min 30
- Poids avec benne standard Kg 650
- Distributeur pourvu de soupapes sur chaque section et mouvements simultanés
- Châssis translabile pour déplacements des bras dans n'importe quelle position
- Stabilisateurs indépendents
- Matériel de construction ASTM 440
- Pivots et doilles en acier cimente et rectifié
- Bennes largeur mm 250 a mm 600
- Sur demande : blocage hydraulique
